

## How do I setup Ethernet backhaul on my Orbi WiFi System?

You can use an Ethernet cable to connect your satellite to your router or another satellite to create a wired backhaul connection.

Before you set up an Ethernet backhaul connection, make sure that you **update the firmware on all your Orbi devices, Firmware Version: 2.1.1.12 and above**

The following image shows how to connect your Orbi satellites to your Orbi router using star topology to create an Ethernet backhaul connection.

The following image shows how to connect your Orbi satellites to your Orbi router using daisy chain topology to create an Ethernet backhaul connection.

The following image shows how to connect your Orbi satellites and your Orbi router to an Ethernet switch.

Note: The Ethernet ports on your Orbi satellites and Orbi router are rated at 1 Gbps. Make sure that the switch ports are 1 Gbps or faster.
